Subject: Bay Area Discovery Museum and EPS

Dear Paul,

Bay Area Discovery Museum is a nonprofit children museum located in Sausalito, California. Our annual "Playdate" auction event is a very important source of funds for the museum, and it is very important that everything runs as smoothly as possible.

The museum has been utilizing Auction Tracker as the event management software for many years. This year we decided to try Event Payment Services, LLC and its ePSPaysm, a terminal payment solution integrated with Auction Tracker with ExpressPay. Our experience with this solution was a positive one.

We mostly appreciated the flexible and personalized support provided by Event Payment Services, LLC before the auction and, mainly, after the auction. Using Express Pay Advantage Credit Card Interface and ePSPaysm terminals allowed us to settle the event payments in a much shorter time than we were able to in previous years.

Based on our experience, the IT department is recommending the use of ePSPaysm terminals by the museum for future events as well.

Regards,

Pavla Luckham
