2855 Anthony Lane S, Suite 130
Minneapolis, MN 55418

Dear Paul,

I want to extend a personal thank you for your companies support and service for *Discovery Ball 2007*. Your products and services were outstanding and we felt very personally supported from our initial conversation throughout our transactions and follow-up. The machines were in excellent condition and came with very clear and easy to follow instructions. The program also integrated very easily with our Auction Tracker Software.

We had some difficulties along the way with terminal close-out and you were very helpful in providing us with alternative means to close out stations and correct our technical considerations. This was our first use of large scale event with both the Auction Tracker Software as well as credit card terminal processing and we felt secure throughout the process with your team's guidance and assistance.

We will certainly consider working with you team again going forward and truly did appreciate your willingness to be onsite with us the night of the event, which went above and beyond my expectations.

Once again, please accept our heartfelt and sincere thanks for your support and service.

Sincerely,

Sarah Glavin
